Notes:

- 'Pole' indicates advertising sign(s) on freestanding pole structure.
- 'Bridge' indicates advertising sign(s) are located on bridges and are contained with the bridge structure unless otherwise agreed by the MCLA.
- Unless otherwise stated, Height of Structure is the maximum height of the advertising sign above the road surface in metres. The Height of Structure is measured from the top of the adjacent carriageway to the underside of the structure (comprising the sign face as nominated and 700mm undercladding).
- Maximum No of Faces refers to the maximum number of advertising signs located on the referenced structure.
- Height of Structure shown * are measured from ground level to the underside of the structure.
- The location of a sign may be varied with the approval of the Minister having regard to site conditions, traffic or road safety considerations.
- Precise locations to be noted on development plans submitted to the MCLA.
- A sign must not emit light or glare which spills directly on to adjacent land so as to cause a material loss of amenity to the occupier of that land.
