

Please see the notes on the following page.

Note:

- Registered objector addresses are indicated by red stars.
- Where more than one objection has been received per property, only one star is shown (including at apartment developments).
- Where addresses are beyond the scope of map, they have not been shown.
- Some objections have been registered against PO box addresses or secondary addresses beyond the scope of the map, these are not shown.
- The map is not a categorical list of all objections, it is a visual representation of the spread of objections immediately around the subject site.
- All objections have been considered in Council's assessment, regardless of whether the address is shown on the map above.
