

Park Street: Overview of Engagement Activities

Engagement activities

The engagement activities for the Park Street Streetscape Project will include:

- Letterbox notification to properties surrounding the corridor (including businesses)
- Corflute signage placed along the street
- Website update
- Have Your Say survey with Frequently Asked Questions - open for four weeks
- Meeting with key local stakeholders
- Drop-in sessions (COVID-19 health advice dependent)
- Social media posts.

Affected residents and businesses will be sent a letter to ensure they are aware of the Park Street Streetscape Improvement Project engagement, with clear information on how they can provide feedback.

Have Your Say survey:

The survey questions reflect previous engagement undertaken as part of the Domain Precinct Masterplan, which canvassed community sentiment about the Park Street streetscape and installation of a protected bike lane. The following is a summary of the feedback being sought on the concept design:

1. Does the proposed landscaping interventions meet the community's expectations?
2. How does the community currently use on-street parking?
3. How does the community want to use on-street parking in the future (through choice of parking controls)?
4. Does the design provide sufficient user amenity such as street furniture and bike parking?
5. Does the community wish to see dedicated provision for dockless bikes and e-scooters on Park Street?
6. How can the proposed design of the streetscape best support your business?
7. Any other feedback on the streetscape improvements design?

Diagrams to illustrate the design, identify the impact of changes and supporting frequently asked questions will be published on the Have Your Say page and website to support the survey.
