

Name	Daisy H2O dry cleaning
Where	130 Rouse St, Port Melbourne Ph: 9681 8850
Proprietor	Paul Littman
Business message	Daisy H2O dry cleaning is unlike others as they provide a non toxic, chemical free cleaning service. Daisy opt for biodegradable detergents eradicating the use of the harsh chemicals and minimising their impact on the environment.
Energy	Daisy have the potential of reducing their energy consumption by 20% which is equivalent to taking 2 cars off the road each year. The biggest uses of electricity is office equipment, washing equipment and lighting. To reduce greenhouse gas emissions emitted Daisy can
Rubbish and recycling	make some changes to their lighting by using more efficient halogens and tubes. With regards to hot water use tap aerators or making the change to a gas hot water system would reduce emissions. Daisy have great waste management practices, recycling cardboard, glass and plastic. Research is also being conducted by the business to find an alternative for plastic garment bags.
Transport	With two stores to work between Paul makes a conscientious effort to minimise trips between to one per day. In addition to this Paul is investigating the possibility of doing bike pickups and keeping all stores in a central location.
