

WASTE AND RECYCLING SURVEY

The City of Port Phillip is reviewing its waste strategy. The current strategy document, *Waste Wise Strategy 2006-2009*, expires at the end of this year. Work has started on a new strategy, to be titled 'Waste Management and Resource Recovery Strategy 2009-2014'. This revised document will help guide Council's waste and recycling operations towards more sustainable practices and drive Council to achieve the waste and recycling targets set out in the Council Plan.

Council is asking for feedback from residents on its current waste and recycling services. It would also like to hear what residents desire for the future of waste and recycling within the City.

If you would like to provide feedback and share your ideas on waste and recycling with Council, please visit www.portphillip.vic.gov.au to fill out the online survey. Alternatively you can fill out a survey in person at the St.Kilda, South Melbourne or Port Melbourne Town Halls.

The Survey will be open until Wednesday September 30, 2009. All feedback will be confidential and all survey results will be incorporated into the new Waste Management and Resource Recovery Strategy, due for release later this year.
