

Public Question Time – answers to questions taken on notice*

Question from Isaac Hermann:

1. Will Council ratify and fast track its own 1998 Elwood Canal Master Plan and 2003 Elwood Canal Management Plan with both resolved to convert a significant portion of Tide Street both in length and width into parkland? Residents also seek a traffic calming design for the street.

Response

To reflect councils focus on water management, a new two year contract position has been developed that will be focused on stormwater and maritime assets. This role will review all the existing plans and strategies and use them as a base for developing an updated stormwater management plan that responds to changes in understanding (such as climate, technology, improved data etc) and that addresses key flooding areas as well as providing a strategic long term stormwater management plan for the whole municipality.

**Note: answers to any questions in Public Question Time which were answered at the meeting are included in the minutes of that meeting.*
